DETAILED ACTION

Claim 1 has been presented for examination.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

1. Claim 1 is rejected under 35 U.S.C. 102(b) as being anticipated by Blake et al. (U.S. Patent No. 5,574,854).

1.1 Regarding claim 1, Blake et al. teaches the functional equivalence of a method for implementing a measurement/control loop (*as the examiner interprets the application program to be the functional equivalence of the measurement/control loop/program*), and particularly teaches the steps of: executing a measurement/control program (*fig.23 (2301), col.1 line 56-60*); executing a simulation program, wherein the simulation program is operable to simulate a system (*fig.23 (2303), col.3 line 10-36*); receiving a request for input from the measurement/control program, wherein the request for input is formulated as a request to read the input from a hardware device (*fig.23, col.49 lines 57-59*); routing the request for input to the simulation program (*fig.23, col. 49 lines 59-60*); receiving request results from the simulation program (*fig.23, col.49 lines 60-63*); passing the request results received from the simulation program to the measurement/control program (*col.49 line 63 through col.50 line 3*).
